DELIVERING ALL THE DATA YOU NEED AT A GLANCE

Designed to put you in full control using state-of-the-art CMP View software

A bespoke in-house development by MP Filtri, the new CMP View software is eye-catching and easy to use and offers customers sophisticated functionality with a simple, straightforward interface that delivers key performance data at a glance.

CMP View complements the advanced functionality of MP Filtri's range of inline and portable particle counters, taking your contamination control programmes to the next level.

- Makes programming ICM devices easy
- Detailed results in all key cleanliness standards
- Customisation of alarms and cleanliness targets
- Real-time data on temperature, relative humidity and pressure
- Plot data in a graph for long-term trend monitoring
- Generate, save and export performance results and graphs
- View results from multiple machines
- Master the software in minutes
